follow ('fɒləʊ), *v.* Forms: *α.* 1–2 folȝian, 2–3 folȝie(n, (folȝhi), folεȝe(n, (folεȝi), 3 folien, folhen, 2–4 folȝe(n, (3 *Orm.* follȝhenn, 4 *south.* uolȝe(n, uolȝy), 3–5 folew(en, (3 *south.* uolewen, 4 follew(e), folwe(n, (4 follwe(n), folu(n, foluw(en, (3 *south.* uoluwen), 4–6 folow(e, foloe, (5 folaw(e, folozȝe, foloyn, 4–6 fowlow(e, 6 foolow(e), 6 *Sc.* fallow, 4–7 followe, 4– follow. *β.* 1–2 fylȝan, fyliȝan, fylȝian, fylian, 2–3 fulien, (3 *south. pa. t.* vulede), 3–4 fulu(n, filȝe(n, filiȝ(en, filyh(en, filiyh(en, felu(n, 4–5 filow, fylow, felow, 5 filoe. [The two OE. types, *folȝian* (*o-* stem) and *fylȝan* (*-jo-* stem), are, as is usual in similar pairs of conjugational variants, representatives of an OTeut. vb. of the *-êjan* class; cf. OFris. *folgia, folia, fulia*, OS. *folgôn* (Du. *volgen*), OHG. *folgên* (MHG. *volgen*, mod.Ger. *folgen*), ON. *fylgja* (Da. *følge*, Sw. *följa*); not recorded in Goth. Beside these forms, several of the Teut. langs. have synonymous and phonetically resembling words which are compounds of GANG and GO *vbs.*; OE. has *fulgangan*, pa. t. *ful-éode* (from *éode*, serving as pa. t. of *gân*) = OS. *fulgangan*, OHG. *folle gân*. The most natural explanation of these parallel forms is that the apparently simple vb. was originally a compound or a phrasal combination. The first element occurs in OE. *fylstan, fullæstan*, OHG. *folleisten* to help, succour, minister to (cf. Goth. *laistjan* to follow), OHG. *follaziohan* to assist, support (= OE. **fultéon*, whence *fultéam, fultum* assistance), Goth. *fullafahjan* to worship, serve, minister to the needs of. In these cases the prefix seems to add to the sense of the simple vbs. the notion of doing something by way of service to another (so that sense 3 of the present vb. is probably nearest to the original meaning). It is on formal grounds probable that the prefix is identical with FULL; its function in the above-cited instances is perh. due to the circumstance that in some vbs. compounded with it the primary sense of 'satisfying' developed into the cognate sense of 'ministering to', 'serving'.]

5. a. A popular name for any costly structure considered to have shown folly in the builder.

R. Wendover says that when (in 1228) a castle which Hubert de Burgh had begun to build, near the Welsh border, had to be razed to the ground on account of a treaty concluded with the Welsh, much amusement was excited by the recollection that Hubert had given to the building on its foundation the name of Hubert's Folly (*Stultitiam Huberti*). It was remarked that he had shown himself a true prophet. Probably the word used by Hubert was F. *folie*; the original meaning seems to have been not *stultitia*, but 'delight', 'favourite abode'. Many houses in France still bear the name *La Folie*, and there is some evidence that 'the Folly' was as late as the nineteenth century used in some parts of England for a public pleasure-garden or the like.

2. The device of a 'fool's cap' used as a watermark for paper.

It has been asserted that the fool's cap mark was introduced by Sir John Spielmann or Spilman, a German who built a paper-mill at Dartford in 1580; but we have failed to find any trustworthy authority for this statement. The Brit. Mus. copy of Rushworth's *Hist. Coll.* (1659) is marked with this device. The watermark called by Sotheby (*Princ.* III.) a 'fool's cap', and said by him to occur in some copies of Caxton's *Golden Legend*, seems not to be correctly so called. The catalogue of the Caxton Exhibition (1877) states that examples of the fool's cap, dating from 1479, are found in a German collection there exhibited. There is no foundation for the often-repeated story that the Rump Parliament ordered a fool's cap to be substituted for the royal arms in the watermark of the paper used for the journals of the House.

1795 DENNE in *Archæologia* XII. 121 The Fool's cap is not in either the Paston Letters or Mr. Ord's Plates. The date of that device in Mr. Fisher's is as late as 1661.

3. A long folio writing- or printing-paper, varying in size (see quots. 1871, 1888).

A document of 1714, shown to us by Mr. R. B. Prosser, is written on paper bearing the fool's cap watermark, and measuring 16½ × 13 in. In 1795 the mark was obsolete: see quot. in b.

When the undivided sheet was placed so that this counterfoil could be read, it was actually at the 'foot' of the parchment (the extant 'feet of fines' have therefore their indentation at the top); in the other two counterparts the direction of the writing was at right angles to that of the 'foot'. The expression *pes indenturoe* 'foot of the indenture' also occurs. Horwood's suggestion, that the term (L. *pes*) arose from a misinterpretation of AF *pes, pois*, 'peace' is baseless.

The use of *for* as a conj. has not been found earlier than the 12th c. The conjunctional use of *for* = *for ðon ðe* may be explained either as an extension of the functions of the prep. to govern a noun-sentence, or as an ellipsis.

for-, *pref.*[1] Also 1 fær-, 3 *Orm.* forr-, 3–4 *south.* vor-, ver-, 4 fur-, 6–7 fore-. [OE. *for-*, *fær-* = OFris. *for-*, *far-*, OS. *for-*, *far-* (Du. *ver-*), OHG. *far-*, *fir-*, *fer-* (MHG. and mod.G. *ver-*), ON. *for-* (Sw. *för-*, Da. *for-*); the ON. *fyrer-* (see FORE- *pref.*) though formally distinct, often corresponds in use with this prefix. The OE. form (like the other forms quoted) seems to represent (with obscured vowel due to absence of stress) the three OTeut. prefixes **fer-*, *fra-*, *fur-* (Goth. *faír-*, *fra-*, *faúr-*), which correspond formally to Gr. *περι-*, *προ-*, *παρα-*, representing various ablaut-grades of the Aryan root **pr-*: see FOR and FORE. Functionally, the three prefixes do not seem to be clearly distinguished even in Gothic; but in most cases when a vb. with OE. *for-* or Ger. *ver-* has a Goth. equivalent, the prefix appears as *fra-*, which seems to have been orig. its *stressed* form: cf. the two OE. forms *'fracod* and *for'cúð* (see FORCOUTH), which are believed to be accentual variants of the representative of pre-Teut. **prognto-*, despicable.

From the predominant meaning of the root, it may be inferred that the primary notion expressed by the prefix is that of 'forward, forth'. The various uses in the Teut. langs. may be plausibly explained as originating from this, though the exact process of their development is in many points uncertain: see Grimm's *Deutsches Wb.* s.v. *ver-*. The vbs. formed with this prefix often correspond in signification to Gr. vbs. formed with one or other of the cognate prefixes *περι-*, *προ-*, *παρα-*, and to Lat. vbs. with *per-* or *pro-*.]

A prefix used to form verbs and adjs., primarily occurring in OE. words of Com. Teut. or WGer. origin, but employed in the formation of new words down to the beginning of the mod.Eng. period; it is now entirely obsolete. Its various functions are enumerated below. The words here explained and illustrated are all obsolete; the surviving words formed with the prefix, and those obsolete ones which require extended treatment, are given as main words in their alphabetical place.

I. Forming verbs.

1. Prefixed to verbs, giving the additional sense of 'away', 'off', as in FORCAST; **forshake**, to shake off; **forshoot**, to cast off, reject; **forthrow**, to throw off.

a **1300** *E.E. Psalter* cviii. [cix.] 23 *For-schaken [Vulg. *excussus*] als gressop. *a* **1300** *Cursor M.* 13663 (Cott.) Quen iesus wist him þus *for-scotten. **1340** *Ayenb.* 86 Zuo þet he ne may hit *uorþrawe to his wylle [mistranslation of *si que il ne sen peult pas jetter dehors a sa voulente*].

2. With the sense of prohibition, exclusion, or warding off, as in FORBID; **forrun**, to bar by running; **forsay**, to renounce, exclude by command. Also with the sense of concealing from view: **forcover**, FORWRAP.

In this use the sense closely approaches that of FOR-², FORE-; cf. FOR(E)FEND, FOR(E)SHIELD.

10. Giving to an adj. the sense of an absolute superlative, 'very', 'extremely'; as ***for-black***, ***-cold***, ***-dry***, ***-dull***, ***-faint***, ***-great***, ***-hoar***, ***-old***, ***-weary***; **fordead**, utterly speechless and still.

[OE. had *for-wel*, very well, very, *for-éaðe*, very easily, *for-oft*, very often; a stressed variant of the prefix is *fræ-*, as *fræmicel* 'eximius', *fræfætt* 'præpinguis', *fræofestlice* 'propere'. Cf. ON. *for-lítill*, very little, *for-mikill*, very great, etc.; also the use of Sw. *för*, Da. *for*, in the sense of 'too'. It is remarkable that nearly all Chaucer's examples of these compounds admit of being explained as instances of *for* prep. governing an adj.; thus in the quots. below, '*for-blak*' may be taken as = 'for black (that it was)', 'for blackness'; '*fordrye*, as whyt as chalk' may be read, omitting the comma, 'as white as chalk for dry (that it was)', 'on account of being so dry.' It is possible that Chaucer himself may have apprehended the combinations in this manner.]

11. *Physics*, etc. Used in various senses developed from the older popular uses, and corresponding to mod. scientific uses of L. *vis*.

a. (= Newton's *vis impressa*: cf. sense 5). An influence (measurable with regard to its intensity and determinable with regard to its direction) operating on a body so as to produce an alteration or tendency to alteration of its state of rest or of uniform motion in a straight line; the intensity of such an influence as a measurable quantity.

Recent physicists mostly retain the word merely as the name for a measure of change of motion, not as denoting anything objectively existing as a cause.

c. The cause of any one of the classes of physical phenomena, e.g. of motion, heat, electricity, etc., conceived as consisting in principle or power inherent in, or coexisting with, matter; such principles or powers regarded generically.

According to the now prevailing view that all physical changes are modes of motion, *force* in its generic sense comes to denote the one principle of which the separate *forces* are specific forms. But sense 11 c is no longer recognized as belonging to the technical language of physics.

[**1732** BERKELEY *Alciphr.* VII. §9 Force is that in bodies which produces motion and other sensible effects.] **1842-3** GROVE *Corr. Phys. fore, obs. pa. t. of FARE.

fore-, *prefix.* In OE. the adv. FORE (like its equivalent in various other Teut. langs.) was used as a prefix (1) to verbs, giving the additional sense of 'before' (either in time, position, order, or rank), and (2) to sbs. either forming designations of objects or parts of objects occupying a front position, or expressing anteriority in time. (Cf. OE. *forecweðan*, Goth. *fauraqiþan*, OHG. *foraquedan* to predict; OE. *foregangan*, Goth. *fauragaggan* to precede; OE. *foretóð*, Ger. *vorzahn* front tooth, etc.). The prefix has through all stages of the language continued to be a living formative in all its uses. The principal combinations are in this work treated as Main words in their alphabetical place; those which are of merely occasional use, or self-explanatory, are enumerated in this article.

I. In verbs, ppl. adjs., agent-nouns and nouns of action. (Stress on the verb.)

1. With the sense 'in front', as in *foregird*, *-lie*, *-lift* (all *Obs.* or *arch.*). Also in agent-nouns, as †*forespurrer*, FORERUNNER, FOREWALKER.

1610 HOLLAND *Camden's Brit.* I. 791 Severus *foregirded and fensed Britain with a ditch from sea to sea. 1590 SPENSER *F.Q.* II. iii. 29 A golden bauldricke, which *forelay Athwart her snowy brest. *Ibid.* I. xi. 15 *Fore-lifting up aloft his speckled brest. 1769 FALCONER *Shipwr.* III. 582 The ship, fore-lifted by the sea. 1596 SHAKS. *Merch. V*, II. ix. 95 This *fore-spurrer.

2. = 'Beforehand', 'previously', 'in advance'.

Formerly, esp. in 16–17th c., the prefix was used with any vb. to which it was desired to give this additional meaning. The number of recorded combinations of this kind is therefore enormous, and only a selection of them can here be given. Now, however, the use of the prefix, except in established combinations such as *foresee*, *foretell*, or in new combinations closely analogous to these, is felt to be somewhat archaistic or affected; in ordinary prose usage the meaning is expressed by the addition of an adverb, or (in verbs of obvious Lat. or Rom. derivation) by the prefix *pre-*.

a. in verbs, as *fore-accustom*, *-acquaint*, *-adapt*, *-admonish*, *-advertise*, *-advise*, *-allot*, *-answer*, *-assign*, *-balance*, *-bespeak*, *-bless*, *-calculate*, *-compose*, *-comprehend*, *-conclude*, *-condemn*, *-consider*, *-contrive*, *-count*, *-date*, *-declare*, *-decree*, *-design*, *-dispose*, *-divine*, *-engage*, *-exist*, *-expect*, *-express*, *-fear*, *-figure*, *-fit*, *-fix*, *-grasp*, *-haste*, *-instruct*, *-learn*, *-lend*, *-mean*, *-order*, *-paint*, *-picture*, *-plan*, *-poison*, *-promise*, *-reckon*, *-repent*, *-report*, *-request*, *-resemble*, *-scent*, *-season*, *-seize*, *-send*, *-shape*, *-shoe*, *-sing*, *-smell*, *-sound*, *-steep*, *-study*, *-suffer*, *-summon*, *-suspect*, *-threaten*, *-trace*, *-use*, *-utter*, *-vow*, *-ween*, *-weep*, *-weigh*.

4. *Philos.* **a.** In the Scholastic philosophy: The essential determinant principle of a thing; that which makes anything (*matter*) a determinate species or kind of being; the essential creative quality.

This use of *form* (Aristotle's μορφή or εἶδος) and *matter* (ὕλη) is a metaphorical extension of their popular use. In ordinary speech, a portion of matter, stuff, or material, becomes a 'thing' by virtue of having a particular 'form' or shape; by altering the form, the matter remaining unchanged, we make a new 'thing'. This language, primarily applied only to objects of sense, was in philosophical use extended to objects of thought: every 'thing' or entity was viewed as consisting of two elements, its form by virtue of which it was different from, and its matter which it had in common with, others.

b. So in *Theol.*, a sacrament is said to consist of *matter* (as the water in baptism, the bread and wine in the Eucharist) and *form*, which is furnished by certain essential formulary words.

Pol.* v. lviii. §2 To make complete the outward substance of a sacrament, there is required an outward form, which form sacramental elements receive from sacramental words. *a* 1600 *Ibid.* VI. iv. §3 Forasmuch as a sacrament is complete, having the matter and form which it ought. 1727-41 in CHAMBERS *Cycl.*

c. In Bacon's modification of the Scholastic use: The real or objective conditions on which a sensible quality or body depends for its existence, and the knowledge of which enables it to be freely produced.

d. In the usage of Kant and Kantians: That factor of knowledge which gives reality and objectivity to the thing known, and which Kant regards as due to mind, or as (in his sense) subjective; the formative principle which holds together the several elements of a thing.

b. In recent use, after Carlyle, often applied more or less disparagingly, e.g. to rules unintelligently or slavishly followed, to fettering conventionalities of usage, to beliefs held or professed out of mere acquiescence in tradition, etc.

Carlyle's use of the word was clearly suggested by the words used of Mirabeau by his father, 'Il a humé toutes les formules'. This really meant that M. had unreflectingly 'swallowed' the watchwords, or cant phrases of his revolutionary friends; but Carlyle mistranslated *humé* by 'swallowed up, made away with', and frequently alludes to the passage as thus misinterpreted. Carlyle's use of *formula*, however, though suggested by a mistake, is in itself a very natural development from the ordinary sense.

D. forth- in composition. In OE. and ME. the combinations of *forth* adv. with vbs. are hardly to be considered compound words; whether the adv. precedes or follows the vb. depends on euphonic or other conditions which do not affect the sense. The agent-nouns, nouns of action, and ppl. adjs. corresponding to these verbal locutions were formed by prefixing *forth* to the verbal noun or adj. corresponding to the verb. In mod.Eng. compound vbs. formed with *forth-* are rare; but *forth-* is often used as a prefix in the formation of nouns of agent and action, and ppl. adjs. corresponding to the verbal phrases (compound verbs in sense but not in form) in which the adv. follows the verb. More frequently, however, the agent-noun, etc. is followed by the adv.; thus we have *a setter forth*, but **forthsetter* is app. not recorded. For the formation of ppl. adjs. the prefix is the only means available; and in poetry from Pope onwards it is very common in pres. pples.

In some OE. and ME. words, *forth-* appears as a substitute for FORE-: see FORTHFATHER, FORTHWARD, FORTHWITH 2.

The more important compounds of *forth-* will be treated in their alphabetical place as Main words; those enumerated in this article are nonce-words or of rare occurrence.

forwards ('fɔ:wədz), *adv.* (and *a.*) [f. FORWARD with advb. genitive *-s*: see -WARDS.]

A. *adv.* = FORWARD *adv.* in its various senses.

The present distinction in usage between *forward* and *forwards* is that the latter expresses a definite direction viewed in contrast with other directions. In some contexts either form may be used without perceptible difference of meaning; the following are examples in which only one of them can now be used: 'The ratchet-wheel can move only *forwards*'; 'the right side of the paper has the maker's name reading *forwards*'; 'if you move at all it must be *forwards*'; 'my companion has gone *forward*'; 'to bring a matter *forward*'; 'from this time *forward*'. The usage of earlier periods, and of modern dialects, varies greatly from that of mod. standard English. In U.S. *forward* is now generally used, to the exclusion of *forwards*, which was stigmatized by Webster (1832) as 'a corruption'.
